

Sometimes it takes  
more than water.  
It takes EcoFlex.

ecoflex<sup>TM</sup> system

# Green meets clean.

ecoflex™ system

Every cleaning challenge is different. Luckily, there's a flexible solution. Advance's EcoFlex™ System goes beyond standard green cleaning by offering sustainability and efficiency, while still meeting the highest standards for clean floors. The result? Green meets clean — the smartest way to go.

## Flexible

Different areas, floor types and facilities need different cleaning. With the ability to easily select the right blend of pad pressure, water and detergent, you can tackle any cleaning challenge. Effortlessly switch between water-only cleaning or different cleaning intensities at the touch of a button. User-friendly controls let you add extra muscle for heavily soiled areas or on tough-to-clean surfaces such as porous or grouted floors.

## Green

Cleaning green with the EcoFlex System is efficient and contributes to building sustainability. The flexibility to develop a cleaning routine that works for your facility and to make on-the-fly adjustments will help you get the most out of all of your resources — from water and detergent to time and equipment.

## Clean

Maintaining a clean, healthy indoor environment for you and the people in your building is hassle-free with EcoFlex. Detergent use, pad pressure and flow rate are right at your fingertips. The controls and operation are so simple that operators won't have to hesitate to make adjustments for higher sanitary standards, different surface types or unexpected cleaning challenges.

# Smart cleaning choice.

EcoFlex cleans like you do, and doing the job the right way pays off. You can develop a routine that works and quickly adjust to whatever the job demands. Be prepared to get more out of your budget, clean with less impact to the environment and maintain clean, shiny floors when you do.

## Cost efficient

Flexibility means getting more out of one machine. With more performance right at your fingertips, you'll save time, use fewer machines, and reduce water and detergent consumption. Today's increasing demands for cost efficiency are tough to meet. Now you can do more with less.

## Environmentally responsible

EcoFlex combines efficiency and sustainability to elevate green cleaning to a new standard – one that promotes good health and hygiene in addition to cleaning in an environmentally preferable manner. Efficient operation reduces all of the environmental impacts in cleaning – from the obvious (water, detergent) to the not-so-obvious (such as machine run-time and energy use).

## Fits any routine

Floor-cleaning routines are easier with EcoFlex. Clean low-traffic areas with water only, use ultra-low detergent when you need to, and jump to a burst of power to deep-clean and tackle dirtier areas. Find the routine that works for you. The system's flexibility makes it easy to develop the ideal routine for your staff, your floors and your budget.

Whatever the job demands, EcoFlex makes getting it done easier. Here are just a few of the different modes you can use to develop a flexible routine or take on any cleaning challenge:

### Water only

Perfect for removing surface dirt and maintaining the clean look of floors. Water-only mode eliminates the impact of detergents on the environment and lowers cleaning costs. It's the greenest, most economical way to clean.

### Ultra-low detergent

Well suited for routine cleaning where a small amount of green-certified detergent will do the trick. Water and detergent are dispensed separately at the scrub deck, eliminating solution waste.

### Standard detergent

The tough cleaning you expect. At the standard detergent dilution, pad pressure and flow rate, you'll have a combination powerful enough to pull stubborn dirt from grout and porous surfaces.

### Burst of power

For deep, restorative cleaning or unexpected challenges. EcoFlex's burst of power temporarily increases your machine's pad pressure, detergent use and flow rate at the touch of a button. You could call it one-touch magic. We call it EcoFlex.

# One-touch flexibility.

# Flexibility for every kind of clean.

Economical and ecological. Advance's EcoFlex System gives you the flexibility to clean your floors more efficiently. By using a system that cleans like you do, you'll reduce your cost to clean and create a more sustainable cleaning program.
